Experience

Full Stack MERN Developer with two years of comprehensive experience in developing user-centric web applications.

Expertise in front-end development with React.js, creating dynamic, high-performance, and responsive user interfaces.

Six months of hands-on back-end development experience using Node.js, Express.js, MongoDB, and Mongoose, enabling Full Stack web solutions.

MERN Stack Developer @ Viral Square   **Dec. 2023 - present**

As a MERN Stack developer at Viral Square, I am actively utilizing Material-UI, Redux Saga, Ant Design, Redux Toolkit, Express JS, MongoDB etc. to create dynamic and responsive user interfaces and Websites

JavaScript Developer @ Gosign   **Nov 2022 - Dec. 2023**

I worked as a JavaScript developer, utilizing advanced tools provided by JS like Event delegation, intersection observer API, promises, etc on a daily basis.

React Developer @ Lyftyfy   **July 2022-Dec. 2023**

Highly proficient in JavaScript and React js. I actively worked in the development and maintenance of LyftLyfy's product, collaborating closely with the team to meet their requirements
